# Robert, The First

Our first introduction. A huge, heavily ruffled, pale rose-purple with an amaranth purple blotch (Ridgway). The general effect is a deep rose-pink. Eight to ten florets open at one time with as high as 20-25 buds to the spike. Winner of many first prizes at the Minnesota State Gladiolus Society Show and at the Minnesota State Fair. It easily won first place in its color class at the International Flower Show held in Chicago, 1936. Now at a price everyone can afford.

L. 25c, 10 for \$2.00; M. 15c, 10 for \$1.20; S. 10c, 10 for 80c; Blts. 10 for 10c, 100 for 75c.

# GENERAL INFORMATION

**ORDER EARLY.** Early orders are solicited to prevent disappointments in case the variety selected should be sold out. It is a good idea to make a second choice as we will not substitute kind but will substitute size in like variety if necessity demands. Please write your name and address plainly.

**STOCK.** Our stock is grown under ideal conditions. We have irrigating facilities, which insure clean, healthy, high-crown bulbs.

**SHIPPING, via EXPRESS or PARCEL POST.** At our option, depending on weight and distance; but if you have special preference, please indicate same. March, April and May are safe months to ship Gladioli. State when delivery is wanted.

**TERMS.** Cash with order: 25% will hold order for Spring delivery. All Orders not paid at shipping time will be sent C. O. D. for balance due, as prices quoted here are all net cash before shipment. If credit is desired, satisfactory Bank references only, should accompany your order.

**EXTRAS ON CASH ORDERS.** On cash orders of \$2.00 to \$5.00 you can select 10% extra in bulbs of your own choosing. From \$5.00 to \$25.00 select 15%; \$25.00 to \$50.00 select 20% and above \$50.00 select 25%. **THESE DISCOUNTS DO NOT APPLY TO COLLECTIONS OR BARGAIN LIST.**

**GROWERS AND JOBBERS.** Write for special discounts on large quantities.

**GUARANTEE.** We exercise every care to ship only first-class stock, but give no warranty, expressed or implied, and will not be in any way responsible for the results of planting or forcing of any bulbs, roots or tubers sent out by us. We are anxious to satisfy all of our customers and will gladly make replacement or refund the purchase price of any article that does not prove true to name or does not arrive in good growing condition. Please notify us at once if a shipment should not arrive in satisfactory condition. If the purchaser does not accept the goods on these terms, no sale is made, and they must be returned at once. No complaints entertained as to condition of stock on arrival unless made within 24 hours after receipt of shipment. All bulbs offered in this price list are grown by us. We are not jobbers. State Inspected under License No. 3685.

**NOTE.** These prices are subject to change without notice.

## Greetings

Another year has rolled around and we again wish to express our appreciation to all of our friends and customers for their wonderful co-operation during the past year. You have made it possible for us to continue to give you the best of quality and service. As business conditions are improving, and everybody is more cheerful, we are hopeful of the beginning of a new era of closer mutual understanding and may it prove to be so for all of our flower-loving friends. Here is hoping that this year of 1938 will bring you health, prosperity and much pleasure to you who love beauty in flowers; and at the close of the day you will find in your garden rest and refreshment in the wonderful things that God has given us.

## Foreword

With the presentation of our 1938 Gladiolus catalog, we have collected such information pertaining to the wonderful new Glads that will be of interest to you. If you have already received a catalog, will you please pass it on to one of your Glad-loving friends.

“It costs no more to grow the best.” In the many years we have been growing Glads, it has been our aim and desire to grow only the best; and what a difference a few cents will make when it comes to judging the merits of the new and improved sorts.

Whenever you are traveling through St. Paul we will be glad to have you call on us. Our season starts with Iris, which are at their best from June 1st to 15th; Peonies from June 15th to 25th; and the Glads, August 10th to September 1st. You may spend an entire day among them if you desire. They are all correctly labeled.

We have expended considerable effort in attempting to make our prices right so that every purchaser may be able to afford those varieties that he desires.

The drouth of 1937 greatly reduced the number of salable bulbs throughout the country. The latest irrigation facilities and an unlimited water supply has again made it possible for us to harvest our usual quantity of high-quality bulbs. The weather last fall was ideal for the curing of the bulbs, and no time or expense has been spared to insure the highest quality. It is with much pride that we offer these bulbs to our customers.

We wish to thank our many friends and customers for their kind letters we received during the past year. It has been a pleasure to read them and to really know what success our customers are having with our bulbs. Our policy is to treat our customers as we like to be treated. We, therefore, feel confident that our strict adherence to the code of ethics and to policy enables you to get greater value for your money than is possible elsewhere.

Sincerely,

A. J. WILKUS, President.

# The Gladiolus

In the history of the floral world, there have been very few varieties or species which have gained the popularity of the Gladiolus within the same space of time. Within a few years it has risen from obscurity until at the present time it is universally grown and admired by millions.

The reason for this is apparent. Its great variety of colors, ease of culture, immunity from disease, long-keeping qualities as a cut flower and the wonderful effects produced by floral artists in making it up into design work for all occasions, place the Gladiolus in the front rank wherever flowers are used.

This catalog contains the names and descriptions of over 250 varieties, and, while all are not new, they are all good and worth growing and can be selected to fit any purse, so that all may have a beautiful garden.

While the utmost care is used in keeping the bulbs true to name, if we ever send you a single bulb that is not true to name, just give us a chance to rectify the error. There will be no quibbling, as our reputation has been built on the foundation of upright, square, honest and courteous treatment.

In addition to our own production we have included in the list the best and most popular moderate-priced varieties now on the market.

We are pleased to offer you the result of years of effort to produce more beautiful flowers. They were produced as a result of our own love for beauty and because we hope to give pleasure to those who also love beauty.

Surround your home with beautiful flowers and there, at the close of day, you will find in your garden rest and refreshment for your soul; in the mornings a renewed inspiration. To your children you will bequeath a more wholesome attitude toward life and an ability to enjoy it. You will attract friends for yourself and help to develop your community.

## Our Gladiolus Report

The 1937 blooming season was an acid test on the various varieties. All weather records were broken for heat and continuous drouth in this section. By selection and reselection we weed out those varieties that do not come up to our high standards. We have an effective method of disposing of inferior sorts, namely, the freezing method. Instead of digging and listing the inferior sorts in this catalog at a very cheap price to dispose of the stock, we prefer to allow them to freeze in the field. This is for your protection.

In addition to our list of choice and new varieties, which have been tested by us and found to be desirable, we offer to you at the lowest possible prices our bargain list. It contains standard varieties that have been selected by amateurs and professional growers as reliable and fool proof. Just run through the list and you will find such strong, vigorous growers as *Aflame*, *Albatross*, *Betty Nuthall*, *Bill Sowden*, *Commander Koehl*, *Dr. Bennett*, *Mrs. L. Douglas*, *Picardy*, *Maid of Orleans*, and *Mildred Louise*, just to mention a few. In our choice and new varieties, will be found those that will become standard varieties as soon as they are better known and stock becomes plentiful. From Scotland, Holland, Germany, France, New Zealand, Australia they come, as well as those from Canada and the United States. We can truthfully say we are growers of the *World's Finest Gladiolus*.

We highly recommend the following varieties: in the reds *Bill Sowden* and *Commander Koehl* are still two of the finest crimson-reds; but we must not forget the old reliable *Dr. Bennett*. They are prize winners everywhere. *Allemania* is of the *Commander Koehl* type, but with larger flowers and earlier. The red that stands out above all is *Del Ray*. It is not a dark red, but a nice medium shade with a pure white throat, tall spikes with lasting qualities that surpass any other Glad that we have ever grown. *Erica Morini* is a fine, early, warm salmon-orange with immense flowers. *Ninth Symphony* is a clear shade of salmon-red without any blotch or markings in the throat. One of our favorites is *Red Admiral*, a red with an undertone of blue that gives it an unusual and unique appearance. *Johann S. Bach* is one of *Pfitzer's* finest; an immense, early salmon-red. One of the finest and deepest reds of late introduction is *Southern Cross*. *Red Phipps*, *Red Lory*, *Amador*, and *Wurtembergia* are being grown more and more each year by people who know good Glads.

The last few years have given us some very fine whites. This last blooming season *Maid of Orleans* proved to be the finest all-around white. *Star of Bethlehem* and *Bob White*, both excellent whites under ordinary conditions did not stand up well under the heat. Burtner's *Big Lily* is a creamy white with large open flowers and a heavy, tall spike. It was iron-clad under all conditions. *Solveig*, when well grown, is a fine ruffled variety. *Heiligtum*, *Pfitzer's* newest white, has a faint touch of pink in it, but made a wonderful spike. *Purity* was the surprise of the season. It was the first to bloom in the field. A pure white, tall, wiry stem and a fast increaser. It is the early white cut flower that we have

been all looking for, and now it is here. Although *Rosemarie Pfitzer* may be classed as a very light pink, we like to think of it as a white that has been slightly tinted with pure pink. *Mrs. Ray P. Chase* reminds one of the creamy white Easter lily, and florists are using forced spikes very effectively at the Easter season. Although the flowers are not exceptionally large, *Mary Elizabeth* makes a very fine exhibition flower as well as a fine cut flower. The cream class has not had any outstanding varieties, but with the coming of *Shirley Temple* we know it will be well represented. *Albatross*, *Mammoth White*, and *Jonkheer Van Tets* are all fine whites, and next year we may add *Polar Ice* if we think there is room for it.

*Golden Chimes* is slowly coming to the front as the finest in the yellows. It is a lovely shade of soft yellow. *Gates of Heaven* was a disappointment this past year, but we hope it will come back, as we know it can produce very fine flowers. *Cadillac* is still one of our favorites; it is a new shade of golden apricot without any throat markings. *Golden Cup*, although not a large flower, is a fine golden yellow and is outstanding as to purity of color. *Golden Dream* can still hold itself with most of the yellows. Something different is *Golden Anniversary*, an enormous flower of fawn-yellow suffused blush-pink with a large, red blotch and finely-ruffled petals. It is quite distinctive and well worth while. *Ruffled Gold* and *Canbarra* are old favorites. If we add a little orange to our yellows, we have *Dearborn* with its mammoth flowers. *Netherland Prince* reminds one of an orange *Giant Nymph* and can be grown just as easily as this fine old variety. No list of oranges is complete without *Betty Nuthall* with its towering spikes.

*Minuet* is still the finest of the lavender varieties. *Isola Bella*, Pfitzer's new lavender-pink, was one of the finest blooms in the Garden and might well be taken as a lavender. *Early Melody* is a fine, early lavender and a wonderful cut flower. *Mme. Schumann-Heink* at a short distance resembles an orchid, markings and all. It is a Diener variety that has been in commerce for some time, but is still very scarce. If you like ruffled varieties, *King Arthur*, with its graceful spikes, is outstanding. *Gertrude Swenson* is the giant among lavenders, but a very poor propagator. An old favorite is *Berty Snow*.

The blue and the dark violet class is progressing more and more each year with the finest varieties coming from Rev. Christ. His *Blue Admiral* is being admired by everyone, but his new *Robert Burns* leaves very little to wish for as far as dark blues are concerned. *Blue Domina* and *Bonnie Blue* are two pleasing and different shades of light blue. *Blue Beauty* was a pleasant surprise. An even shade of dark blue with a wonderful spike. From Germany comes *Max Reger*, a blue with sharp, white lines in the throat giving the flower the resemblance of a beautiful blue butterfly. *Allegro*, Pfitzer's new light blue, and *Rudolph Serkin*, his new dark, pansy-blue were both very fine. *Pelegrina*, when well grown, is a hard one to beat in the blue class. A spike shipped from our Gardens to the Sioux City Glad Show won for us the best flower in the show.

*Picardy* in the pinks still stands supreme. *Miss New Zealand* is fast coming to the front. We find the apricot-salmon color very pleasing, and six to eight-inch florets are not uncommon. *New Era* is a wonderful shade of pure pink, fine stem

and very good propagator. *Phyllis McQuiston* made wonderful spikes, and is well worth while. *Mildred Louise* is giving *Picardy* a good run for top honors; and in some respects we like it better. *Smiling Maestro*, in the orange-salmon class, is another of Rev. Christ's fine varieties. *Sonatine*, Pfitzer's new pure pink, is a real super Glad; it is one of the finest colors we have seen in a long time. *Margaret Fulton*, a rich salmon-pink that makes an ideal spike for cutting, is one of our favorites. Good pinks are almost endless. We have *Lotus* for its delicate coloring, *Jessie* for dependability, *Miss Greeley* and *Early Dawn* for early flowering and *Schwaben Girl* for its pure pink coloring.

*Robert, the First*, introduced by us three years ago, has received favorable comments throughout the country. Mr. E. W. Fisher of Glenns Ferry, Ida., writes: "I raise a few thousand Glads here for my own pleasure, and I can truthfully say that *Robert, the First* was the best Glad in my garden last year. This is an unsolicited testimonial. *Robert, the First* was offered last year as a good, dependable Glad with only a short description and no "Ballyhoo" or whatever you wish to call it. The price is within reach of everyone and all we ask you to do is try it.

If you are looking for the odd and unusual, we recommend *Chippewa*, an ashes of rose color with wide open flowers; *Hinemoa*, a chocolate brown; *Union Jack*, a Marmora with a red blotch, and *Bagdad* and *Mother Machree* as the best of the true smokies. Our color cut of *Vagabond Prince* is an exact reproduction. It is the finest we have seen in a long time.

Something should be said about commercial cut flower varieties suitable for forcing, as well as those grown in the field during the summer months. The prerequisites of a good cut flower variety are numerous. It must have a good length of stem, flowers not too massive nor too large, but should have all the qualities of a decorative type. A self color is preferred over mixed colors, the lighter shades over the darker. Such varieties as *Orange Queen*, *Gold Eagle*, *La Paloma*, *Al Smith*, *Melody*, *Gloriana*, *Giant Nymph*, *Apricot Glow*, *Marnia*, *Break O' Day*, *Antione*, *Annie Laurie*, *Cara Mia*, *Rose Mist*, and *Mrs. Calvin Coolidge*. In the larger flowering class the following are very useful as cut flowers: *Picardy*, *Mildred Louise*, *Maid of Orleans*, *Carmen Sylva*, *Dr. Bennett*, *Berty Snow*, *Minuet*, *Mrs. F. C. Peters*, *Betty Nuthall*, *Pride of Wanakah*, *Veilchenblau*, *Margaret Fulton*, *Dream O' Beauty*, *Cadillac*, and *Johann S. Bach*, just to mention a few.

A new Glad, to get near the top today, must be a Glad for all general purposes. It must satisfy the florist as well as the garden lover; it must be fine enough to exhibit in the showroom; and it must have substance and vigor to endure all of the different variations of temperature and environment under which it will be grown. The price does not always show the merit and beauty of any variety. When there is a quantity of stock in any variety, the prices drop as with any other commodity. New varieties are high only because of their scarcity. Of course, some may drop more rapidly in price than others, as they increase faster, while those that are poor increasers usually drop very slowly.

It was my pleasure this past season to attend several large Flower Shows throughout the country. Many fine varieties were shown and the prize winners were

such varieties as *Smiling Maestro*, *Picardy*, *Sonatine*, *Frank J. McCoy*, *Mildred Louise*, *Heritage*, *Miss New Zealand*, *Phyllis McQuiston*, *Aflame*, *Bleeding Heart*, *Del Ray*, *Commander Koehl*, *Johann S. Bach*, *Red Phipps*, *Star of Bethlehem*, *Maid of Orleans*, *Solveig*, *Rosemarie Pfitzer*, *Minuet*, *King Arthur*, *Berty Snow*, *Salbach's Orchid*, *Cadillac*, *Golden Cup*, *Oregon Sunset*, *Betsy Bob-Up*, *Dearborn*, *Wasaga*, *La Paloma*, *Pelegrina*, *Veilchenblau*, *Blue Admiral*, *Max Reger*, *Robert the First*, *Dream O' Beauty*, *Bagdad*, *Mother Machree*, and *Lucifer*.

In a rambling way, we have given you a little information which may be of interest and of value to you. We have only touched upon those varieties which are known by close observation to have met with the approval of judges and lovers of Glads throughout the country. The modern Glads of the summer and early fall gardens are the most popular of all flowers. They are valuable to the landscape gardener for the color splashes and bedding purposes, to the florist and home decorator as the most beautiful and lasting of all garden flowers. The spikes grow tall and elegant, sturdy and dignified, slender and graceful, and the color range absolutely infinite. There is the single spike for the slender vase, a corsage for the luncheon guest, an attractive basket for the debutante, and a glorious bouquet for your friends.

RIVERVIEW GARDENS received many prizes and awards at the shows during the season of 1937. Many high awards were won for commercial growers at the State Gladiolus Society Show. At the Minnesota State Fair, the largest and finest show of commercial growers in the NORTHWEST we were winners of high awards. Best flower in the Minnesota Show was won with a fine spike of *Miss New Zealand*.

## How To Grow Good "Glads"

In the spring, as soon as the ground has dried out, spade your garden to a depth of at least 12 inches. Plant the bulbs in rows about 20 inches apart to admit free and intensive cultivation, and about 3 inches apart in the row, covering with 6 inches in light soil and 3 inches in heavy ground. Be sure that the covering soil is mellow.

**FERTILIZING.** If some good rotted manure can be procured in the fall, give the garden a good coating and spade it under. Realizing that such fertilizer is hard to obtain, we must take the next best choice and use a commercial fertilizer. For the average gardener the best to use is sheep manure. After the row or trench is made this fertilizer can be applied thickly in the bottom and mixed with the mellow earth, but we prefer setting the bulbs, then covering with an inch or two of earth and then applying the fertilizer before the row is filled in. This allows the fertilizing properties to soak down to the roots where it is needed. After growth has started another application on each side of the row and thoroughly worked into the soil is of much benefit; in fact, this top-dressing can be applied several times during the growing season. Before flower spikes appear, a good top-dressing of super phosphate and potash worked in will greatly benefit the flowers. **GROWING FLOWERS SHOULD HAVE A CONSTANT SUPPLY OF MOISTURE AT ALL TIMES.**
